PROFILE

My name is Yauhenia.

I'm 27 years old. I devoted 9 years to medicine and decided to change the field of activity. Now I study Front-end at Rolling Scopes School courses and I have 1 years of development experience.

I easily assimilate information, learn quickly, can easily switch from one task to another, like to cope with non-standard situations. I'm stress resistant, calm and ready to action.

I'm looking for a job or internship in Front-end development. I'm interesting in reactive technologies, especially React. My forte is medicine, so I can be very usefull in projects connected with wellness and health. But also curious and open to different spheres.
